

Secure & Energy Efficient Doors
The Launa Man Can

Why choose Launa Windows?

Launa Windows is one of the most respected home improvements companies in the local area. Our dedicated team has decades of experience and is committed to providing you with the highest quality, most innovative products, the best service and the best overall value for money. To put it simply, we care more than any other company about giving you the very best.

So whether you're replacing your windows and doors, building a conservatory, or making your home more energy efficient the Launa Windows team has the experience to give you sound advice and ensure that you are happy with the final result.

On the following pages we will show you some of the many choices available to you including: window and door options, frame finishes, glazing, how to make your home more secure, extending your home with a new conservatory and adding style with contemporary bi-fold doors!

We have carried out thousands of installations for thousands of happy customers; this brochure only shows a tiny amount of what we can offer you. Don't forget to take a look at our web site www.launa.co.uk and don't hesitate to ask our team if you have any queries.

Certified Quality

Don't Just Take Our Word For it!

Our suppliers conform to strictly controlled and independently monitored Quality Management Systems such as ISO 9001, to ensure that everything is done correctly and according to best practise.

Our casement windows are independently tested by the British Standards institution to the following standards.

BS7412: Covers materials, construction, security, safety, weather tightness, operation and strength performance.

PAS24: Is the very stringent improved security test, where windows are tested to destruction to ensure they meet the requirements of enhanced security.

This means that periodically we have to send them to independent test houses to be tested to destruction. These are just some of the many standards that products in our vast product range conform to! Needless to say we take the quality of our products very seriously indeed.

Buyer Beware

To comply with Building Regulations your window and door installation will have to be registered with Building Control and meet strict requirements.

There are two main regulatory bodies, these are CERTASS and FENSA. These organisations carry out random site inspections to ensure that installations comply with current building regulations on things like; fire escape windows, energy efficient glass, use of toughened safety glass etc. You can check on their website to ensure that your chosen installer complies, needless to say we do!

Both CERTASS and FENSA have done a great job in raising industry standards,

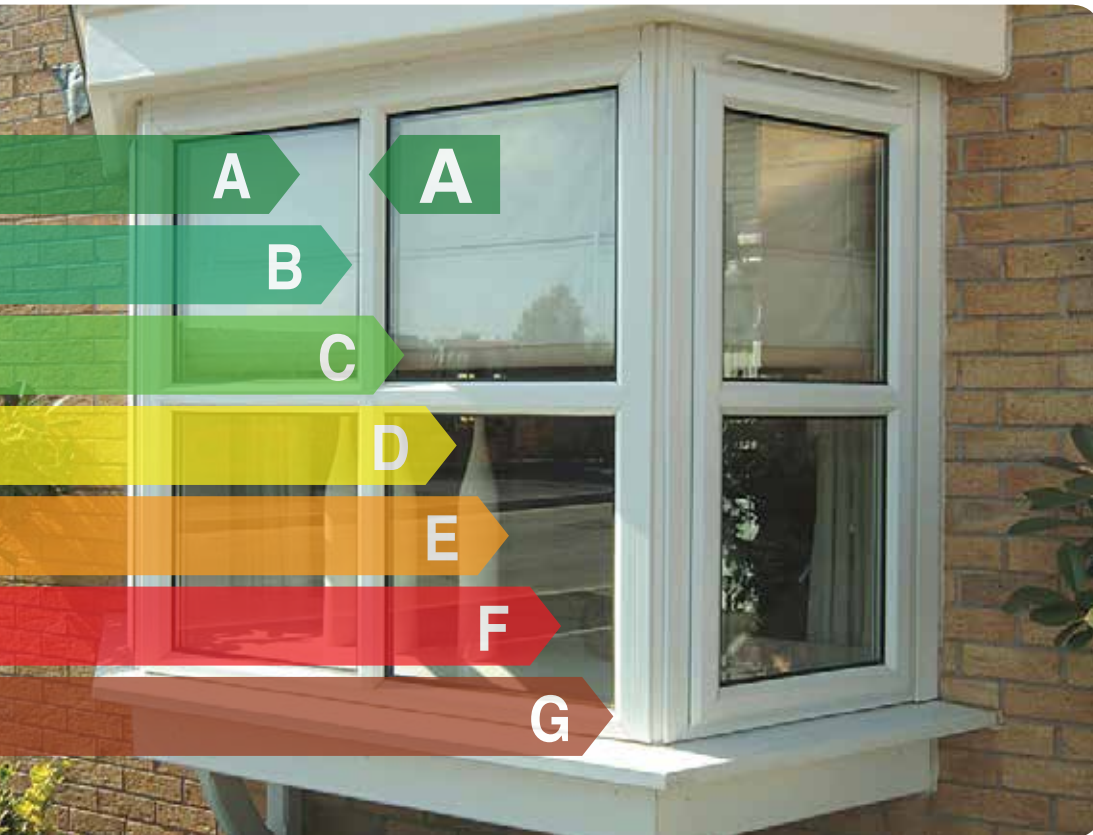

but unfortunately there are still a lot of cowboys out there. Some glass companies have reported that as much as 30% of glass that they supply doesn't even meet the 2001 regulations for thermal efficiency, as unscrupulous installers look to cut costs. Buyer beware!

Your installation will be registered with CERTASS (www.certass.co.uk). Solicitors will nearly always ask to see a copy of this certificate if you sell your house, so make sure that you keep it safe.

Superior Energy Efficiency

The average window company stays in business for only 15 months. It's a shocking statistic in an industry full of cowboys. This has resulted in shoddy sales practices, products that don't even meet minimum compliance standards and substandard products made from the lowest price components.

Exceptional performance:
that's good news for the planet and for your pocket.

Turn your home into a lean green energy-saving machine, by installing our PVCu windows and doors. We can help to reduce your carbon footprint and your energy bills in lots of clever ways.

Our product range features multi chambered profiles and we can offer you the most advanced glass available. For the ultimate energy savings, why not opt for our Triple Glazed windows.

Top Environmental Credentials

Our products come top of the class when it comes to environmental credentials. They have been awarded an energy rating of up to A for maximum thermal efficiency.

CE Marking

As from July 2013, windows and doors have to meet the requirements of CE Marking. It is against the law to not comply.

Thermal Ratings

By law your windows and doors have to meet strict thermal performance regulations. Rest assured that our products exceed all current requirements.

Stylish & Secure Doors

Make a statement with a stylish and secure PVCu or Composite door

Protect your family

Dependable and durable with proven high security and safety performance, they'll stand up to the challenges of your busy everyday life and keep your home safe and secure.

Curb appeal

Create a lasting impression, with doors that are as visually striking as they are strong. Upgrade your home with front and back doors that won't rot or fall apart, however hard you make them work.

Personalise your door

A choice of styles and colours whether you prefer a classic white finish or traditional woodgrain effect. We also offer a massive range of glass designs, styles and door furniture to create a truly stunning entrance to your home.

Easier access

Our doors come with optional Part M compliant low thresholds which are specially designed to provide access for wheelchairs and pushchairs.

Door & Side Panel Combinations

Side panels and top lights are available to compliment your door in a choice of frame colours and glass designs, custom made to your exact specifications.

Quality Panel Doors

Our extremely popular PVCu doors are manufactured from virgin grade material to prevent discolouration and are subject to rigorous performance testing to ensure consistently high quality. Heres a handfull of the hundreds of designs available.

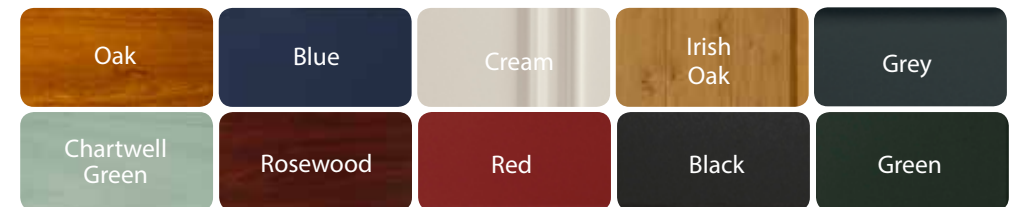

100's

You can choose from a range of high quality furniture including letter plates, knockers, spy viewers and numerals to individualise your door.

Colours & finishes

Stunning colours and woodgrain finishes to create a grand entrance to your home:

Composite Colour Doors

We have hundreds of composite door styles available, here are just a few.

A stylish entrance.

Our high quality composite doors come in a range of elegant styles and colours to enhance the entrance to your home. No compromises have been made in fitting the best components for years of maintenance free use.

What is a composite door?

Composite doors use the latest GRP technology (Glass Reinforced Plastic) to offer the ultimate in strength, style and durability.

Better home security

With multipoint locks and strong hinge mechanisms, our doors are manufactured with security in mind. The GRP skin, a super strong structural frame and up to the minute hardware offer the highest possible security. Upgrade to Secured by Design specification for maximum security

Woodgrain effect colours

The surface of the door has a woodgrain texture to mimic the look of timber. Take a look at the colour options.

Contemporary Style Doors

A selection of stunning styles available with a range of carefully selected decorative glass options that enhance the look and feel of the door whilst maintaining the clean good looks.

To give great definition and long life performance our composite doors use glass reinforced plastic skins. That's the same material used to make the hulls of boats!

Patio Doors

Custom built for a perfect fit

Patio doors are back in fashion as they are easy to operate, don't blow about in the wind, can span large widths and give you a large glass area; they can be specified in PVCu or Aluminium.

PVCu doors are available in two, three and four pane configurations; we also offer a low threshold option for easy access. Our aluminium patio doors are available with all the options above and in any RAL colour.

We also offer a double track system with three panes that can span over 6 metres, where all panels slide back over one, this is a great alternative to bi-folds as they are easy to operate, give maximum glass area and don't flap in the wind.

Available configurations:

Aluminium only.

Double track allows two panes to slide over one

French Doors

Classic choice offering unrestricted access

French doors can be specified either as a pair of doors, doors with side screens or even with openers in the side screens. Bear in mind that the maximum door width is around 1800mm or 2000mm at a push with extra hinges and a technical disclaimer,

which is the reason that customers opt for side screens. French doors can be fitted with restrictors to hold them open at 90 degrees, or aperture permitting, you can fold them back and fit cabin hooks to hold them in position.

Stable Doors

Traditional style with maximum ventilation

PVCu stable doors provide maximum ventilation without the need to open the whole door, so you can keep your pets and children safely in doors, whilst allowing lots of fresh air into your home. Doors come with

galvanised steel reinforced frames and multi-point locks to ensure maximum security. Our doors are available in a range of colours and you have a wide choice of glazing and hardware options to complement your home.

Bi-Fold Doors

Transform your home with beautiful folding doors

Bi-fold doors are the fastest growing product in the home improvements sector, it's not surprising really as installing bi-fold doors can completely transform your living space.

We are leading players in the bi-fold door market, so you can trust us to provide you with the best quality, competitively priced doors available, made in our own state of the art factory. We have recently employed the head technician from

Smarts Aluminium Systems to ensure that we remain at the forefront of technology.

Bi-fold doors allow the maximum use of space and glide along top and bottom tracks using stainless steel rollers, making opening and closing effortless.

Call: 0800 083 77 77

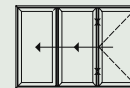

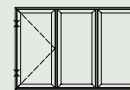

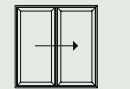

It's important to choose your door configuration carefully to best meet your requirements. The main choices are all doors opening one way, a single door to one side (which depending on the configuration can either have a handle on the outside or not, so be careful!), or incorporating a set of french doors. The next major decision is whether you want them to stack inside or outside. Most open out as they will give you a lower threshold and more internal living space. Open in doors are normally specified where you have restrictions such as a juliet balcony.

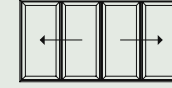

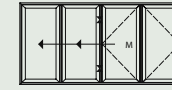

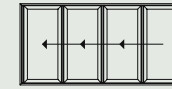

The doors are available in PVCu and Aluminium in a wide range of colours, so you can match your new doors to the style of your home. Opening configurations include:

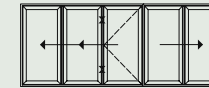

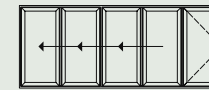

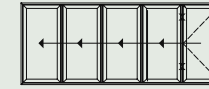

2/3 Pane

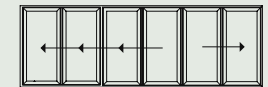

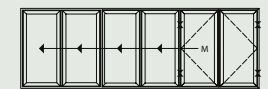

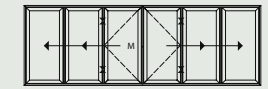

4 Pane

5 Pane

6 Pane

Choose from either aluminium doors in any RAL colour for maximum durability and choice, or PVCu doors in white or a number of woodgrain colour finishes.

slimmer sightlines

easy opening smooth operation

extra security

10 year guarantee

wide choice of colours

bespoke British designed hardware
